

Animals & Habitats

This half term we will be learning all about animals and their natural habitats! Your challenge is to research an animal of your choice! It could be a tiger, lion, elephant, ostrich, shark...anything you like!

Showcase: Tuesday 18th July at 2:45pm

How could I set out my project?

What should my project include?

You could set your project out in a number of ways, it is completely up to you! Although here are *some* ideas....

- Fact file
- PowerPoint presentation.
- Create a model of the animal and its habitat.
- Create an information booklet.

Where does your chosen animal live? (country & continent)

What is their natural habitat like?

What do they eat/drink?

Do they live alone or with their families?
